

COLOR POWDER INFORMATION

Powder is supplied by Color Blaze

<https://www.wholesalecolorpowder.com/>

- Color powder FAQs available on website (precautions, clean up, etc)
- Safety Data Sheet on site and available upon request.

INGREDIENTS:

Color Blaze colored powders are made with cornstarch, food dyes and baking soda.

SAFETY PRECAUTIONS:

Sunglasses/safety glasses and bandanas/masks/buffs over mouth/nose are recommended to wear during powder throws. Powder throws are aimed below the neck but some dust will still be airborne. Disposable masks will be available.

Participants with asthma and/or allergies may choose to keep a safe distance from the Color Throw area

CLEAN UP:

Recommend shaking excess color powder off prior to showering/washing clothes. May be slight staining but will fade within a day or two (like food coloring does). Light/blonde hair may stain (which does wash out over time) so some suggestions are a light coating of conditioner (or coconut oil) prior to color throw.

ELECTRONICS:

Wrap electronics (phones, cameras, etc) in baggies or plastic taped securely to prevent the dust from infiltrating.
